

We are a Telehealth service that provides psychiatric assessments and management plans to GPs **Australia Wide**.

We offer psychiatric assessments and a management plan under **Item 291**. These are once off assessments with a comprehensive plan for the GP to implement with the patient. A follow up review is also offered after the initial assessment under Item 293.

We see a wide range of psychiatric presentations, including **ADHD**.

We also see patients under WorkCover, DVA and TAC.

#### **ADHD assessments and management plans**

- We offer assessments and treatment options for patients querying a diagnosis of ADHD.
- We love to collaborate with our experienced GP and Psychologist colleagues in providing a psychiatrist review and medication options, as required for prescribing regulations.
- We don't provide ongoing care, but we can see patients at the interval recommended by state regulation for continuation of ADHD medication.
- For ADHD assessments we see patients from the age of 17 to the age of 55.
- We assess and offer treatment options for co-morbidities in a holistic approach.

#### **There is minimal waiting time**

- At present all patients will be offered an appointment within three to four weeks of us receiving the referral.
- On request we can see patients within 1 week if their assessment is urgent.
- All reports are sent to the referring GP within one week of the assessment.

#### **High standard**

- Our reports are of the highest standard.
- We are responsive to referrer and patients, and have excellent and experienced full time administrative support.
- We aim to use a holistic approach to treatment with a focus on the patient's individual needs.

#### **Referrals can be made via:**

## About the Founder - Dr Sherol Hanna

Dr Hanna is an experienced clinician with over 15 years experience in psychiatry.

Dr Hanna graduated from Monash University with a Bachelor of Medicine and Bachelor of Surgery (Honours) in 2005. She completed a Master of Psychiatry from the University of Melbourne in 2012. Her psychiatric training was undertaken at Alfred Health in Victoria. She has held senior roles in a number of public and private psychiatric hospitals throughout Australia.

Dr Hanna prides herself on her ability to work with a diverse patient population. She is empathic, approachable and focused on establishing rapport and engagement with her patients. Her style is to focus on the individual's needs with a preference for a holistic approach to management.
